

Brand & product language

Your state. Your progress.

A practical visual system for a fresh, personal fitness app.

Light, airy, tactile and energetic.

A fresh operating system for your fitness.

Training, sleep and recovery in one daily view.

Better, in progress.

Working tagline / proposed in the Fitness discussion

Direction & provenance

Built from the Fitness project

Source: "App name ideas", Fitness project, 14 September 2026. Revised to restore the original light, airy and tactile direction.

01 / Lead with state

Answer "How am I today?" before displaying individual metrics.

02 / Let it breathe

Use warm cloud space, strong numbers and a restrained colour system.

03 / Make glass count

Reserve translucent surfaces for navigation, the Form hero and controls.

Established direction

Form name; light interface; Warm Cloud #f6f7f4; Form Green #7ad957; Deep Ink #17201c; selective glass; F-based identity; state → recommendation → activity → trends.

Identity and system status

Layer is the approved logo direction: three rounded, stepped elements, the Form wordmark and a green glass app icon. The remaining interface specifications formalise the Fitness concept and guide implementation.

Approved identity

Layer, the Form identity

Approved direction: three rounded elements step down in length, expressing progression through a simple silhouette.

Form / Layer

App icon

Favicon

Use the supplied artwork as the visual master. Keep the wordmark in sentence case. Clear space: at least one bar height around the mark.

Use the flat mark at favicon sizes. Keep glass for the app icon. Do not add a vertical stem, rotate the bars or change their relative lengths.

Colour

Green is the signature

Use secondary colour to explain data. These tones should never compete with the primary action.

			
Warm Cloud #f6f7f4 Canvas / established	Form Green #7ad957 Brand fill / established	Deep Ink #17201c Text / established	Mist #dce3db Dividers / proposed
			
Recovery #8ddddd Recovery & sleep	Training #4a8cf0 Training load	Running #f28e7c Running & pace	Action Green #316d22 Links & focus / proposed

Pair Deep Ink with lime buttons. Keep small text off translucent colour washes. Use Action Green for green text on Cloud; retain labels and symbols alongside all status colours.

Typography & layout

Quiet labels. Confident numbers.

Type direction: a neutral sans serif with clear numerals. Use the system interface family in the app.

82 Today's Form

Good morning, Ben

You're in good shape to train today.

Recovery / Sleep / Load / Activity

Hero metric	64 / 68, semibold
Screen title	28 / 34, semibold
Section heading	20 / 26, semibold
Body & controls	16 / 24, regular or medium
Metadata	13 / 18, regular

Sizes are app px / line height. Use tabular numerals for changing metrics. Base spacing: 4 px; prefer 8, 12, 16, 24, 32 and 48. Mobile inset: 20 px. Card padding: 20-24 px.

Type specimens use Segoe Ui as a close visual stand-in for the proposed system interface typeface.

Materials

Glass with purpose

Visual recipe. Static document examples approximate translucency; live blur must be checked in the app.

Today's Form

Trends

Glass / material tokens

Fill: white at 72-88% opacity

Backdrop blur: 20-28 px

Border: 1 px white at 70%

Shadow: 0 8 32 px, Deep Ink at 6%

Hero radius: 28 px

Cards: 20 px / controls: 14 px / pills: full

Keep dense charts on opaque or bare surfaces. With reduced transparency, use solid white and a Mist border. Never place essential text over uncontrolled imagery.

Components

One clear next action

Base components. Dimensions refer to the app, independent of the scale of these examples.

Start training

Cards: one primary destination. Focus: 2 px Action Green outline with 2 px offset. Disabled controls remain readable and explain unavailable actions.

Data & iconography

Make the meaning visible

Pair every colour with a label. Use a consistent rounded line style for navigation and metric icons.

Form trend

Last 7 days / illustrative data

Chart rules

Label units and time range. Keep axes honest; bars start at zero. Show a missing-data gap instead of a zero. Use direct labels and distinct line styles when series overlap.

Icon rules

24 × 24 px grid; 2 px stroke; rounded caps and joins. Use simple home, activity, moon and trend motifs. Active navigation keeps its label and gains a filled pill. Use the F only for brand identity.

Recovery: aqua / Training: blue / Running: coral. Status uses explicit words: Ready, Take it easier, or Data unavailable. A score is never communicated by colour alone.

Screen composition

How am I today?

Illustrative dashboard, using the hierarchy agreed in the Fitness project. Values and recommendations are sample content.

[Today](#) [Train](#) [Trends](#)

1 / Current state

Form score and a plain-language explanation first. Give the user access to the contributing metrics.

2 / Next action

Place the planned session next. Keep the recommendation separate from the action label.

3 / Longer view

Continue below the fold with the weekly plan, running progress and trends. Navigation remains calm and visible.

Behaviour & handoff

Keep the experience dependable

Delivery rules to carry the visual direction into a working product.

Readable by default

Support larger text and reflow. Target 44 × 44 px minimum touch areas; use 48 px for primary actions.

Honest about data

Show last sync time. Missing score: “Not enough data yet”. Errors retain existing data and offer Retry.

Calm in motion

Use 160-240 ms transitions. Respect reduced motion; avoid perpetual pulsing, parallax and counting scores.

Implementation review

Check text contrast on the actual composed glass surface. Aim for at least 4.5:1 for body text and 3:1 for large text and essential interface boundaries. Verify keyboard focus, screen-reader names and non-colour status cues.

Design status

Version 1.2 incorporates the approved Layer identity. The package includes the approved artwork, a vector mark and favicon files. The glass icon and wordmark are supplied as artwork references; live glass behaviour and score logic require implementation.
